Jon specialises in all-mountain, freeride & touring skis & believes that his offering from Whitedot, Scott, Blizzard, Dynastar & Dynafit are the best of their type on the market & cover all requirements.

Jon also specialises in carbon hybrid constructed skis which are, depending on the length/width can be up to **500g lighter per ski** than a typical traditionally constructed ski. And the mountaineers say that half a kilo on your feet is equivalent to carrying three kilos on your back so this weight saving has a significant effect on fatigue whether skiing, skinning or boot packing.

CONTACT JON FOR DETAILS OF HIS SPECIAL OFFER PRE-ORDER PRICES FOR SKIS PURCHASED BY THE END OF JULY. WE ALSO HAVE GREAT PRE-ORDER SKI/BINDINGS &/OR QUIVER KILLER PACKAGE PRICES.
