

WELCOME

HISTORY & TUNING SERVICE

Based in Nottingham UK, Jon's Ski Tuning was launched to provide discerning skiers and snowboarders with a quality hand tuning & servicing facility for skis & snowboards. Our client list has steadily grown through recommendation and over 200 bespoke hand tunes/services were completed during the 09/10 season.

See the 'Services' section for details of the tuning options that are available.

TUNING EQUIPMENT

Whilst sourcing the market for quality tuning products for use on my own and customer's equipment it quickly became apparent that there was a total lack of quality tuning products and advice that was easily available to UK skiers and snowboarders. Moreover, DIY tuning was considered by most to be some sort of 'black art' only to be undertaken by the retail sector. Nothing can be further from the truth.

So in addition to offering a hand tuning service, Jon's Ski Tuning is now firmly established as the country's leading supplier of personally tested quality tuning products and tuning advice, at the most competitive prices available in the UK.

Product specifications, prices & ordering facility can be found in the 'On-line Store' section.

TUNING TUITION

If you're new to DIY tuning then simply come to Nottingham for one of Jon's now legendary personal tuning lessons. See the 'Tuning Tuition' section of my on-line store for further details plus there's plenty of previous client feedback in the 'Testimonial' section.

SKIS & BINDINGS

Jon's Ski Tuning is proud to announce it's continued appointment for 10/11 as a sales, mounting & service centre for

WhiteDot Freeride skis

Storm skis

and

Vist bindings

Look Pivot bindings

Specification details on skis & bindings can be found in the 'On-line Store'.

This website is constantly being updated with the latest products and techniques so that it remains the centre of excellence and the ultimate one-stop-shop for all things 'tuning'. Please feel free to browse and to give feedback.
